

REMARKS

This application is a divisional of U.S. Patent Application Serial No. 10/241,200 ("the Parent Application") and the specification is amended to include that information. The Examiner in the Parent Application said that a restriction was required therein to one of the following three inventions:

- I. Claims 1-4 ("Group I");
- II. Claims 5-10 ("Group II");
- III. Claims 11-21 ("Group III").

Applicant elected to prosecute the claims of Group I in the Parent Application. Applicant has decided to prosecute the claims of Group II in this application and thus has canceled herein claims 1-4 and 11-21 of the Parent Application. Applicant has amended the Summary of the Invention to delete therefrom the paragraphs that correspond to the independent claims that are canceled by this amendment.

Respectfully submitted,

Date:

8/6/03
